Profile

I am a Senior Software Engineer with 5+ years of experience aiming to work on amazing projects that will lead to impactful social and technology changes on the world.

- Senior Software Developer adept in bringing forth expertise in design, installation, testing and maintenance of software systems.
- AWS Certified Solutions Architect - Associate certified.
- 4+ years experience as an engineer in Finance Tech companies/branches.
- Proficient in various platforms, languages, and cloud providers.

Employment History

Senior Software Engineer, Valari (YC W22), Blumenau

OCTOBER 2022 – PRESENT

First founder engineer at Valari. A BaaS company for LATAM that offers cutting edge technology for embedded banking to companies that want to provide banking services and features to their clients.

Valari absorbs all the legal, bureaucracy and technology complexity of the country to offer banking services, making it super simple to companies to offer this features.

As a founder software engineer, I'm responsible for the following responsibilities:

- Research and develop software.
- Plan and design/architect distributed scalable software architectures.
- Manage Valari software infrastructure.
- Design and manage new features and company services.
- Exploratory and development with LLM technology for financial copilot.
- On-call schedules.

Software Development Engineer, Amazon, São Paulo

MAY 2021 – NOVEMBER 2022

As a software engineer at Amazon I have worked at the Brazilian Amazon fintech team, responsible for building, handling and managing systems to support Amazon operations regarding financial and accountability towards internal and government responsibilities.

As a software development engineer, I'm responsible for the following tasks:

- Research and develop software.
- Plan and design/architect distributed scalable software architectures.
- Manage Amazon fintech software infrastructure under my responsibility.
- Design and manage new features and company services.
- On-call schedules.
- Documenting processes and operational software tasks.
